## OLIS TROLLEY ACADIA NATIONAL PARK

One of the smaller National Parks in the country, Acadia is one of the most heavily visited. There are 17 high points of land with Cadillac Mountain being the highest on the east coast. There are numerous lakes in the park with Eagle Lake the gem when viewed from the summit of Cadillac. The views of the ocean from the summit are breathtaking. Acadia is a combination of attractions that make it unique as a destination.
